· INDEX VOLUME 34 ·

A

A nice guy at the top 308
A very public member 408
ABB on the right track 338
AC traction in Finland by J.A. Taufiq 381
AI, the language of, and beyond by R. Dettmer 61
Airships are on the way back 333
Alvey, after 100
Anti-theft satellites on the road 256
Arbitration, commercial, and the engineer by G.M. Beresford Hartwell 23
Arbitration, the telegraph by B. Bowers and J. Richardson 433
ASIC soundness 422
Automation, Racal-Milgo reaps benefits of 134

B

Baird, John Logie, the early work of, (1888-1946) by R.W. Burns 312
Band III: dead or alive? by D. Moralee 111
Banister, R.: New machines for old 283
Bell, D.A.: Electric fields and health (letter) 350
Bell, D.A.: Risk assessment and perception (letter) 281
Beresford Hartwell, G.M.: Commercial arbitration and the engineer 23
Better connections 374
Bhattacharya, S.: The intelligent instrument. Its role in factory automation 203
Big draw at DES 370
Big turnout for Electrex 6
Board, quality across the by B. Popplewell 67
Bounds, D., Grant, P., and Wallace, D.: Following nature's example 117
Bowers, B. and Richardson, J.: The telegraph arbitration 433
Bradford, M.: The operator/computer interface. Ensuring a good working relationship 161
Bridgewater, T.H.: Early days of lighting (letter) 350
Brief message 54
Bright picture for HDTV (letter) 399
Broadcast services, no, in bands I and III 211
Brown, A.F.: Failure in service — university training of engineers 359
Brown, C.N.: Early days of electric lighting 223
Budden, R.J.R.: CHP and the Energy Act 341
Bundey, D.A.: Power lines and health (letter) 310
Burns, R.W.: The early work of John Logie Baird (1888-1946) 312
Business, starting your own by A. Ridyard 139

C

CEGB seeks approval for two new stations 95
CEGB seeks new sites 337
Cellular, French 135
Centrally heating Southampton 293
Childs, I.: HDTV — putting you in the picture 261
China, electricity in by O. Poon 301
China, power for 97
Chips could be down in 1989 419
Chips for ISDN 338
CHP and the Energy Act by R.J.R. Budden 341
CHP, Mini systems — a small price to pay for bigger profits by D. Flanders 192
CHP, Mini systems (letter) 281
City of London's computers, power for 6
Claridge, G.M.L.: ESI privatisation (letter) 310
Class 91 locomotive, the,. Learning from the APT by R. Dettmer 188
Clery, D.: Design awards for computer control 53
Comms boom? 371
Communications on the move by D. Shaw 83
Computer interface, the operator/. Ensuring a good working relationship by M. Bradford 161
Computer, the Rekursiv by R. Dettmer 17
Computer viruses (letter) 399
Connections, better 374
Connections, making the right 97
Connor, M.G.: The right person for the job 108
Contracts, the responsibilities of engineers in. Delivering the goods by A.J. Wheeldon 199
Control centre, new, for London 338
Copyright, designs and patents act 1988, the by V. Irish 439
Cornish, A.J.: Electronics in the air (letter) 115
Cory, B.J.: Expert systems for power applications 147
Crew, E.: The British disease (letter) 241
Cutting edge, the by P. Logan 74

D

Delivering the goods. The responsibilities of engineers in contracts by A.J. Wheeldon 199
Design awards for computer control by D. Clery 53
Dettmer, R.: Go fast, go Forth 423
Dettmer, R.: Have skills, will travel. Engineers for disaster relief 348
Dettmer, R.: IT at ITEX 450
Dettmer, R.: Making RISC respectable — the Motorola 88000 237
Dettmer, R.: Making software safer 321
Dettmer, R.: Muck to megawatts 243
Dettmer, R.: Privatising nuclear power — home thoughts from abroad 278
Dettmer, R.: The affordable gigaflop 123
Dettmer, R.: The all-electric car 195
Dettmer, R.: The Class 91 locomotive. Learning from the APT 188
Dettmer, R.: The language of AI and beyond 61
Dettmer, R.: The long goodbye to Magnox 326
Dettmer, R.: The quest for the quantum dot 395
Dettmer, R.: The Rekursiv computer 17
Dettmer, R.: The silicon PCB 411
Dettmer, R.: TV by radio 375
Digital storage oscilloscope 334
DMMs, more, for your money 371
Docklands light railway by R. Kemp 103
Drive and ambition by P. Sewell 71
Drive safely 54
DTI research restructuring 255
DTI's materials world 102

E

Early days of lighting (letters) 350
Ear, the all-electric by R. Dettmer 195
EBU decisions 217
EDI, making the most of 217
Eight-tone pager 256
Electrex — a long way from St. Hilda's 136
Electrex, big turnout for 6
Electric fields and health (letter) 350
Electric vehicles — Swiss interest accelerates by R. Kay 93
Electronics in the air (letter) 115
Electronics takes to the air by J. Watson 11
EMC — a proposed standard 54
Employee involvement 337
Energy efficiency wins awards 133
Enterprise and education 370
ESI privatisation (letters) 191, 310
ES2 chip 337
European Report by G. Roberts 9, 57, 107, 146, 184, 226, 266, 306, 346, 400, 438
Expert systems for power applications by B.J. Cory 147

F

Failure in service — university training of engineers by A.F. Brown 359
Farrell, P.G.: The British disease (letter) 281
Faster design to market 294
Fibres, transatlantic 338
Fields, killing, or . . .? 178
First air-driven hydro scheme 293
First find your graduate (letters) 150
Flanders, D.: Mini CHP systems — a small price to pay for bigger profits 192
Fly in the ointment (letter) 310
Following nature's example by P. Grant, D. Wallace and D. Bounds 117
Ford, MI keeps, ticking over 177
Forrest, J.S.: Superconductors come in from the cold 78
Forth, go fast, go by R. Dettmer 423
Fountain, V.A.E.: Computer viruses (letter) 399
From Russia with luv 166
Functional electric stimulation by L. Grant 443
Further support for HDTV 255

G

Gallium arsenide, a new generation of integrated circuits by D.V. Morgan 315
Gamlin, J.F.: Personal attitudes and industrial performance 143
Garrard, C.J.O.: ESI privatisation (letter) 191
GEC sweeps the board 293
Gigaflop, the affordable by R. Dettmer 123
Godier, I.: Bright picture for HDTV (letter) 399
Good and bad ways to privatise electricity 34
Gordon, P.: Lifts — past, present and future 37
Graduate, first find your by G. Moore 32
Grant, L.: Functional electrical stimulation 443
Grant, P., Wallace, D., and Bounds, D.: Following nature's example 117
Grants for video courses 419
Groocock, J.M.: Lift reliability (letter) 115

H

Hanging on the telephone 215
Harker, K.: The evolution of organisation design 271
Harman, M.: SWEB power for the Scillies 219
Harvey, A.T.: Early days of lighting (letter) 350
Hately, A.: First find your graduate (letter) 150
Have skills, will travel. Engineers for disaster relief by R. Dettmer 348
HDTV, further support for 255
HDTV — putting you in the picture by I. Childs 261
Home automation by J.L. Ryan 355
Hydro scheme, first air-driven 293

I

Industrial performance, personal attitudes and by J.F. Gamlin 143
Information Engineering Directorate, hello, goodbye Alvey 47
Information, keeping safe by D.J. Silk 120
Inmarsat orders satellite 174
In retrospect 36, 80, 122, 145, 193, 217, 287, 328, 367, 407, 435
Instrument, the intelligent. Its role in factory automation by S. Bhattacharya 203
Investing in Britain the Japanese way 47
Irish, V.: The Copyright, Designs and Patents Act 1988 439
Irish, V.: Pirates in business suits 313
IT at ITEX by R. Dettmer 450
It's a Fluke 337

J

Japan, a year in, Parts 1 & 2 by W. Rashman and M. Urwin 447, 451
Job, the young person's guide to getting a by W.R. Seymour 377

K

Kay, R.: Electric vehicles — Swiss interest accelerates 93
Kemp, R.: Docklands light railway 103
Kibble, B.P.: Redefining the volt and ohm 351
Kidd, A.W.: Wind-energy costs (letter) 115
Kidd, A.W.: Wind energy (letter) 350
Killing fields or . . .? 178

L

Learning by satellite 297
Ledger, F.: The power to command and control, privatisation and the CEGB 58
Let's get fiscal 228
Lift reliability (letter) 115
Lift reliability, quality and (letter) 191
Lifts — past, present and future by P. Gordon 37
Lighting, early days of electric by C.N. Brown 223
Line, longest 177
Liquid-crystal display 255
Locomotive, the class 91,. Learning from the APT by R. Dettmer 188
Logan, P.: The cutting edge 74
Logical initiatives 213
Longest line 177
Looking to the future 116
Lorton, P.R.: Quality and lift reliability (letter) 191

M

MacQueen, A.: SI privatisation (letter) 310
Maglev, will, lift off? by E. Riches 427
Magnox, the long goodbye to by R. Dettmer 326
Magor, C.A.: Mini CHP systems (letter) 281
Making the most of EDI 217
Marconi abroad 420

Marconi calibration laboratory 95
Marketplace, adapting to the by G. Moore 48
Megawatts, muck to by R. Dettmer 243
Mentor, hot line from 99
Metaxas, R.: RF and microwave energy hots up 185
Microprocessor, the 32 bit, — a recipe for computation by R.J. Stubbs 231
MI keeps Ford ticking over 177
Microsystems buyout 255
Micro, 68030-based 177
Microwave energy, RF and, hots up by R. Metaxas 185
Mini CHP systems (letter) 281
Mini CHP systems — a small price to pay for bigger profits by D. Flanders 192
MIPS, 16 000, from AMT 334
Mitsubishi drives on 371
Moore, G.: Adapting to the marketplace 48
Moore, G.: First find your graduate 32
Moore, G.: Riding the storm 28
Moore, G.: Risk assessment — black art or science? 151
Moore, G.: Sorting out the Post Office 5
Moore, G.: Space-age television 76
Moralee, D.: Band III: dead or alive? 111
Morgan, D.V.: Gallium arsenide, a new generation of integrated circuits 315
Morrison, W.G.: The British disease (letter) 241
Motorola museum 370
Motorola's new RISC microprocessor 99
Muck to megawatts by R. Dettmer 243

N

Newell, A.: The rise and fall of a kingdom 344
New machines for old by R. Banister 283
New management for privatisation 253
New name 215
New switched reluctance motor 294
New target set for Pickup 213
No broadcast services in bands I and III 211
No dilemma for Stag 334
Nuclear power, privatising, home thoughts from abroad by R. DetNuclear power, privatising, home thoughts from abroad by R. Dettmer 278
Nylon to data discs, from 49

O

Olivetti stake 99
On-stage current transducers 180
Operator/computer interface, the. Ensuring a good working relationship by M. Bradford 161
Organisation design, the evolution of by K. Harker 271
Oscilloscope, digital storage 334

P

Pager, eight-tone 256
Pager, safe 337
Parliamentary Report by P. Oppenheim 7, 55, 102, 138, 181, 218, 258, 298, 390, 432
Peckham, J.: Talking to machines 385
Pell, C.: Phased-array radars 363
Penplotter to photoplotter 374
PEP, record, saving for London 338
Phased-array radars by C. Pell 363
Phonepoint calling 420
Pickup, new target set for 213
Pillar Electrical is born 374
Pirates in business suits by V. Irish 313
Pole, a strole to the 47
Poon, O.: Electricity in China 301
Pope, N.O.: First find your graduate (letter) 150
Popplewell, B.: Quality across the board 67
Porges, F.: Risk assessment (letter) 241
Portable video-cassette instrumentation recorder 211
Post Office, sorting out the G. Moore 5
Potter, A.: Britain's space programme — to be or not to be? 155
Power applications, expert systems for by B.J. Cory 147
Power lines and health (letter) 310
Power on the move 215
Power, privatised, on the Thames 213
Power, SWEB, for the Scillies by M. Harman 219
Power to the outback by M. Twidell 268
Pre-university engineering 422
Prins, T.: Soft options from British Telecom 288
Privatisation and the CEGB, the power to command and control by F. Ledger 58
Privatisation, new management for 253
Privatise electricity, good and bad ways to 34
Privatised power on the Thames 213
Privatising nuclear power, home thoughts from abroad by R. Dettmer 278

Q

Quality and lift reliability (letter) 191
Quantum dot, the quest for the by R. Dettmer 395

R

Racal enters hybrid market 48
R&D expenditure up 95
Rashman, W.: A year in Japan, Part 1: Canon insights 447
RCA, great engineers at the 6
RDS on the road 371
Redefining the volt and the ohm by B.P. Kibble 351
Reluctance motor, new switched 294
Renewables budget up 6
Research, DTI, restructuring 255
Research list 253
Reviewing the review 131
RF and microwave energy hots up by R. Metaxas 185
Ridyard, A.: Starting your own business 139
Richardson, J. and Bowers, B.: The telegraph arbitration 433
Riches, E.: Will maglev lift off? 427
Right person for the job, the by M.G. Connor 108
RISC, making, respectable — the Motorola 88000 by R. Dettmer 237
Risk assessment and perception (letter) 281
Risk assessment — black art or science? by G. Moore 151
Risk assessment (letter) 241
Robots, UK, look healthy 174
RSRE, the, a brief history by D.H. Tomlin 403
Rudd, D.: First find your graduate (letter) 150
Ryan, J.L.: Home automation 355

S

Satellite-communications tests 294
Satellite telecom laws, DTI loosens 134
Satellites, anti-theft, on the road 256
School chips 135
Sensorimotor, Evershed to market 53
Sewell, P.: Drive and ambition 71
Seymour, W.R.: The young person's guide to getting a job 377
Shaw, D.: Communications on the move 83
Silicon PCB, the by R. Dettmer 411
Silk, D.J.: Keeping information safe 120
Sizewell, world-record wall at 9
Skyphone takes to the air 256
Smaller dishes for DBS (letter) 191
Smart card for Wales 177
Soft options from British Telecom by T. Prins 288
Software quality 54
Software safer, making by R. Dettmer 321
Software Sciences nets MoD contract 294
Space-age television by G. Moore 76
Space-based navigation 256
Space programme, Britain's — to be or not to be? by Anne Potter 155
STE bus spec 49
Storm, riding the by G. Moore 28
Stubbs, R.J.: The 32 bit microprocessor — a recipe for computation 231
Sugar steals the show 51
Superconductivity accord 133
Superconductivity club 338
Superconductors come in from the cold by J.S. Forrest 78
Surface mount 54
Surveillance receiver 256
Swift-Hook, D.T.: Wind-energy — it's the cheapest 30
Swift-Hook, D.T.: Wind energy (letter) 241

T

Talking to machines by J. Peckham 385
Taufiq, J.A.: AC traction in Finland 381
Telephone, hanging on the 215
Telepoint calling 297
Testing time for alliance 255
The British disease (letters) 241, 281
The Class 91 locomotive. Learning from the APT by R. Dettmer 188
The rise and fall of a kingdom by A. Newell 344
Thermography by balloon 253
Thermography goes hire 173
Tomlin, D.H.: The RSRE, a brief history 403
Tonge, G.J.: Smaller dishes for DBS (letter) 191
Transducers, on-stage current 180
Translite trial 374
Transputer anniversary 135
TV by radio by R. Dettmer 375
Twidell, M.: Power to the outback 268

U

UK robots look healthy 174
Uninterruptible power supplies 253
Unicn, the new-wave 99
Urwin, M.: A year in Japan, Part 2: Research to production in Toshiba 451

V

Viewing the future 211
Viper development system 95
Viper, progress on 337

W

Wallace, D., Grant, P., and Bounds, D.: Following nature's example 117
Watson, J.: Electronics takes to the air 11
Weather monitoring equipment 293
Wheel clamping by phone 133
Wheeldon, A.J.: Delivering the goods. The responsibilities of engineers in contracts 199
Wind-energy costs (letter) 115
Wind energy — it's the cheapest by D.T. Swift-Hook 30
Wind energy (letters) 241, 350
Wind turbine in Kent, work starts on 99
Wong, Shun-Kwan.: Fly in the ointment (letter) 310
Workstation, picturesque, from Stellar 334
World-record wall at Sizewell 9

Y

Young person's, the, guide to getting a job by W.R. Seymour 377

Book reviews

Ainsworth, W.A.: Speech recognition by machine 320
